Route description: This bicycling route will take us from Cavtat, across Zvekovica, Gornja Banda, Konavle field and Donja Banda back to Cavtat. The route begins in the centre of Cavtat (1) at the small bus station. Next to the bus station there is a store in which you can stock up on water and food necessary for the ride. In the summer period, during hot days, make sure you bring enough water with you. We sit on our bikes and head uphill slowly along winding roads in the direction of Zvekovica. Be careful on the road due to increased traffic. After about 2,6 km from our starting point we come to the intersection (2) with the highway Dubrovnik – Čilipi. At the intersection, with great caution, we cross over to the other side and continue down the road through Zvekovica. We come to a T intersection, 2,9 km from the start, at which we turn left. After 200 m we come to a Y intersection with the main road which runs through Gornja Banda. At the intersection we turn right and slowly begin to cycle uphill through Gornja Banda and ride towards Gabriele. After the intersection we cycle cautiously due to the traffic on the road. At the Y intersection (3), 3,6 km from the start, we continue right. Wonderful vistas of the Konavle field and Donja Banda slowly open up to the right side. After 8,6 km from the start we pass by the Chapel of St. Martin with a beautiful belvedere. An easy ride through Gornja Banda ends at a T intersection (4), 10,3 km from the start, where we turn right and head downhill in the direction of Konavle field. On our downhill run we must keep an eye out for the sign for the Gallery Šiša. At 11 km from the start we arrive at the gallery of the renowned Croatian artist Miho Šiša. Here we should stop and look through the gallery and this is the perfect place for a rest before continuing our journey. After the gallery we come to a T intersection at which we turn right and head downhill to the locality Miljasi. In Miljasi at the T intersection (5), 12 km from the start, we turn right and head down the road through a field towards the airport and Čilipi. To the left is a road which leads toward Pridvorje where a Franciscan monastery is situated. We cycle slowly through the field and delight in the views offered to the right of Gornja Banda, and left of Donja Banda. We come to a T intersection (6), 15 km from the start, at which we turn left in the direction of Čilipi, while the gravel road straight ahead leads in the direction of Zvekovica. After turning, along winding roads, we cycle towards Čilipi. Just before entering the centre of Čilipi with great caution we cross the intersection with the highway (7), 16,2 km from the start. After the intersection we come to the main square (8) in Čilipi on which the Church of St. Nikola is located. After a rest we continue towards Cavtat and follow the bicycle route connecting Čilipi and Cavtat. We cycle down the street Bistoče downhill all the way to the intersection with the main road connecting Čilipi and Radovčići. At the Y intersection, 17,3 km from the start, we turn right and continue cautiously down the main road. After 200 m at a T intersection (9) we turn left. Be cautious when turning left. Further on we continue through a picturesque region leading to the village Donja Banda. After 18,3 km from the start we come to a T intersection (10) at which we turn left and continue past a car dealership. At the T intersection (11), 19,2 km from the start, we turn right and continue towards Cavtat. After 20,7 km from the start we come to a T intersection (12) at which we turn right. At the T intersection (13) with the Chapel St. Mary we turn left towards Dikličići. In Dikličići at the T intersection (14), 21,7 km from the start, we turn right and after 100 m we turn left into a narrow field path to Pendovo selo. In the centre of Pendovo selo, at the T intersection (16) we turn left while the road leading right heads towards the highway. Further on the route leads us down a narrow asphalt road through Pendovo selo, all the way to a plateau offering a breathtaking view of Cavtat, the sea and Dubrovnik in the distance. From here begins a steep downhill slope towards the highway and one must be cautious and adjust cycling to the road conditions. After cycling downhill we come to a T intersection (16) with the highway, 23,1 km from the start. At the intersection we turn left and with great caution cycle to the next intersection (2) at which we turn left towards Cavtat. At the intersection (2) with great caution we turn left and continue down the road leading to Cavtat. Before entering the very centre of Cavtat we pass along winding roads, along which we began this route, and we complete our ride in the centre of Cavtat (1).
